

Hans Angelo Amponin

Frontend Developer | React · TypeScript · Redux Toolkit · MUI · Next.js

Meycauayan, Bulacan, PH · +63 976 625 1776 · hansamponin@gmail.com · [Portfolio](#) · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Developer with 2 years of professional experience delivering production-grade React/TypeScript applications in a fast-paced fintech environment. Built and shipped four business-critical tools—spanning warehouse monitoring, asset valuation, master-data search, and an auction platform—that demonstrably cut manual processing time and improved user productivity. Actively expanding into full-stack development and seeking a remote-friendly role where I can grow toward senior-level engineering responsibilities.

EXPERIENCE

Frontend Developer · *Asialink Finance Corporation* · Sep 2024 – Present

React · TypeScript · Redux Toolkit · RTK Query · MUI · Azure Repos

- Built a Warehouse Monitoring System (React TS + MUI + Redux) end-to-end in 6 weeks, improving UI responsiveness and cutting employee navigation time by 30–40%.
 - Delivered a Fair Market Value Generator in under 2 months, eliminating manual spreadsheet workflows and reducing Sales team processing time by ~30%.
 - Redesigned and optimized a nationwide Master List Search application (2M+ records), directly supporting a 21% YoY company growth target through improved data-retrieval UX.
 - Developed an Auction Web Application frontend with a real-time bidding interface that onboarded 1,000+ active clients and measurably increased platform engagement.
 - Held de facto tech-lead responsibilities on the frontend team—reviewing PRs, defining component architecture, and onboarding teammates.
-

PROJECTS

Canvus — Real-Time Flowchart Collaboration Tool 2025

React · TypeScript · WebSockets · Node.js

- Designed and built a browser-based collaborative diagramming tool supporting real-time multi-user editing via WebSockets.
- Implemented conflict-resolution logic and optimistic UI updates to ensure a smooth editing experience under concurrent edits.

Isuzu Philippines — Website 2025

Freelance · Vanilla JS · HTML · CSS

- Co-developed the official Isuzu Philippines corporate website, implementing responsive page layouts and interactive UI components.

Amazones Gym — Client Website 2025

Freelance · Vanilla JS · HTML · CSS

- Co-developed a multi-section marketing site for a Japanese women's-only gym brand, including a Google Reviews carousel, FAQ accordion, store listing cards with embedded Maps, and animated modals.
-

EDUCATION

B.S. in Computer Engineering Aug 2020 – Jul 2024

Bulacan State University, City of Malolos, Bulacan

ACHIEVEMENT

Top 10 Finalist, QOMPETE 2024 National Student Startup Challenge (Apr 2024)

Pitched “JumpStart,” a freelancing platform for student freelancers, before a national panel of industry judges.

SKILLS & TECHNOLOGIES

Frontend: React JS/TS, Redux Toolkit, RTK Query, MUI, Tailwind CSS, Bootstrap, Next.js

Backend: .NET Core, Express.js, Node.js

Database: MongoDB, SQL, Redis

Tooling: Git, Azure Repos, Docker, Figma, Vite

CERTIFICATIONS

- **Microsoft Full-Stack Developer** — *Microsoft* (Dec 2025)
- **Full-Stack Developer Capstone Project** — *Microsoft* (Dec 2025)
